Professional Experience

Full Stack Developer

Mainnet Design · July 2024 – Present (1 year 9 months) · Hybrid - Rio de Janeiro, Brazil

- Led requirements gathering and timeline definition for implementing new features in enterprise applications.
- Conducted technical meetings with stakeholders to align feedback and adjust development strategies.
- Delegated tasks and mentored junior and mid-level developers, promoting code quality and architectural best practices.
- Developed pixel-perfect visual interfaces from Figma designs, ensuring high fidelity to design specifications.
- Implemented secure authentication and authorization systems using JWT, OAuth 2.0, and external provider integration.
- Integrated REST APIs, GraphQL, and gRPC to expand functionality and connect heterogeneous systems.
- Structured and managed SQL and NoSQL databases according to project specifications.
- Configured DNS, managed multiple environments (Production, Staging, QA, Dev), and implemented automated CI/CD pipelines.
- Created and managed cloud infrastructure on AWS, Google Cloud, and Vercel, including resource provisioning and cost optimization.
- Proactively monitored servers and databases to ensure high availability, performance, and stability.

Full Stack Developer

Juicy Space · September 2023 – September 2024 (1 year 1 month) · Remote

- Developed full stack web applications using React.js, Next.js, TypeScript, Node.js, and SQL/NoSQL databases.
- Implemented real-time communication using WebSockets for chat features, notifications, and live updates.
- Optimized application performance through bundle size analysis, code splitting, and lazy loading.
- Implemented automated testing (Jest, Vitest, Testing Library) ensuring code coverage and quality.

Full Stack Developer

Trivod · September 2021 – May 2023 (1 year 9 months) · Remote

- Developed full stack applications from conception to deployment, including technical documentation and testing.
- Worked in Scrum methodology with active participation in sprint planning, dailies, reviews, and retrospectives.
- Implemented microservices architectures with asynchronous communication via RabbitMQ and message queues.
- Collaborated with clients and stakeholders for requirements gathering and expectations alignment.

Technical Skills

Frontend: React.js, Next.js, Redux, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, SASS

Backend: Node.js, NestJS, Express, Python (FastAPI), C# (.NET Core, ASP.NET), API Development (REST, GraphQL, gRPC), WebSockets, Microservices

Databases: PostgreSQL, MySQL, MongoDB, Prisma ORM, SQL, NoSQL, Data Modeling and Architecture

Cloud & DevOps: AWS, Google Cloud, Vercel, Docker, CI/CD Pipelines, DNS Configuration, Environment Management (Prod/Staging/QA/Dev)

Testing & Quality: Jest, Vitest, Testing Library, Unit Testing, Integration Testing

Tools & Practices: Git, Responsive Design, Cross-Browser Compatibility, SEO, Figma to Code Conversion, Scrum, Kanban

Featured Projects

Markado - Service Scheduling Platform

Complete scheduling platform with Google Calendar/Meet integration, multi-step authentication system, availability management, and Stripe payment integration. Stack: Next.js, TypeScript, tRPC, Prisma, PostgreSQL, Docker. CI/CD with GitHub Actions.

Video Converter - Microservices Architecture

Video to MP3 conversion application with microservices architecture: API Gateway, authentication services, asynchronous conversion via RabbitMQ, and notifications. Stack: NestJS, Next.js, PostgreSQL, MongoDB GridFS, Docker, Kubernetes. Monorepo with E2E tests.

Flora - Satellite Vegetation Analysis Platform

Vegetation analysis platform using Sentinel-2 data via Google Earth Engine. Real-time NDVI calculations, RGB imagery, and interactive map interface. Python backend (FastAPI), Next.js frontend with React Leaflet. Project aimed at democratizing precision agriculture tools.

Sua Mesa Fit - Headless E-commerce with Shopify

Headless storefront using Hydrogen (Shopify/Remix). Custom components, Shopify Admin API integration, optimized search, and cart with shipping calculation. Stack: Remix, Hydrogen, TypeScript, GraphQL.

Bee Dash - Influencer Analytics Dashboard

Marketing campaign analysis platform with social media API integration. Interactive dashboards and data visualizations. Stack: NestJS, Next.js, TypeScript, PostgreSQL, Prisma, shadcn/ui.

Education and Languages

Education

Chemistry

Federal Institute of Rio de Janeiro (IFRJ)
July 2019 – December 2022

Languages

Portuguese: Native

English: Advanced (fluent)

Key Competencies

- Technical leadership and developer mentorship focused on architecture, best practices, and code quality.
- Complex problem-solving with high adaptability and excellent analytical skills.
- Continuous learning and pursuit of best practices, trends, and emerging technologies.
- Collaborative communication with clients, stakeholders, and multidisciplinary teams.
